

Deploy NDN CERT on NDN Testbed

- Motivation:
 - NDN CERT protocol has been updated to version 0.3, which promises better security and effectiveness.
 - Current certificate management system used in NDN testbed is still based on HTTP(s)
- Main tasks
 - Work out the instructions of deploying NDN CERT on testbed and yield usable scripts for automated continuous deployment.
 - Dry run the user interfaces provide by NDN CERT and fix potential issues
- Team leader
 - Zhiyi Zhang
